

**COST Action CA21107**

**Work Inequalities in Later Life redefined by Digitalisation (DIGI-net)**

**1<sup>st</sup> Call extended for the Dissemination Conference Grants**

**Grant period no. 2**

**Applications for Dissemination Conference Grants**

**occurring between**

**30<sup>th</sup> May 2024 and 8<sup>th</sup> September 2024**

The aim of the *COST Action 21107: Work Inequalities in Later Life redefined by Digitalisation (DIGI-net)* is to overcome critical gaps in conceptual innovation on the influence of digitalisation on work inequalities in later life, in order to address the research-policy disconnect and tackle work inequalities in later life redefined by digitalisation. The Action will enhance scientific knowledge by integrating the different disciplines and schools of thought, by developing collaborations with public policy officials, international policy bodies, non-academic professionals, civil society NGOs, trade unions, management of organisations and older workers themselves.

The Action is an innovative participatory, interdisciplinary, and cross-European network. The first area concerns social inequalities in cases where some groups are privileged, and other groups are marginalised. The second knowledge gap concerns organisational age culture in which stereotypes and discrimination are known to strongly shape organisational life for older workers in terms of hiring,

training and retirement. A third largely unexplored central area concerns the complex interplay and connection between digitalisation of work and older workers' health, which is a vital condition for extending working life. A fourth directions envisage policies and practices dealing with digitalisation and who are implemented by national governments as well as by European institutions and organisations. The fifth dimension of the CA21107 is focused on the social, corporate and news media reflecting and propelling stereotypes of older workers and digitalisation.

## **Purpose of the Dissemination Conference Grant**

The Dissemination Conference consists of an oral presentation by an Action Participant of the work at an high level conferences fully organized by a third party (not organized nor co-organized by the COST Action). Dissemination Conference significantly increase visibility of the Action in the research community, can contribute to increasing visibility of the presenter, attract additional participants and stakeholders and disseminate Action results to relevant end-users at high profile conferences in the field on a topic relevant to the CA 21107.

Dissemination Conference Grantee receives support for attending and delivering an oral presentation of the Action, their activities, and results at a conference and for developing new contacts and potential future collaborations.
